Resolved, That knowledge, learning and virtue being essential to the preservation of Republican institutions, and the diffusion of the opportunities and advantages of education throughout the different portions of the State being highly conducive to the promotion of this end; it should be the duty of the General Assembly in all future periods of this Government to cherish literature and science. That it is the duty of the State to see that facilities for education are provided for the children of the poor, as well as for the rich, and that a well regulated system of common schools is essential to the welfare and prosperity of the State.

welfare and prosperity of the State.

Resolved, While we deplore the evils of the unprovoked and causeless war now ravaging some of the fairest portions of Europe, we congratulate the educated and intelligent people of Germany and the friends of civilization and progress upon the results, alike honorable to the former, and encouraging to the latter.

Resolved, That we utterly disapprove of the course of the present Legislature in repealing the liberal common school system adopted by the Republican party; in depreciating the credit of the State by failing to provide for the paythe Republican party; in depreciating the credit of the State by failing to provide for the payment of the interest on her public debt, thereby adding annually and largely thereto; in repealing all Republican legislation in behalf of the laboring classes, including the law exempting a given amount of wages from garnishment; in their hostility to immigration; in repeal of laws for the protection of the colored man, and in refusing in bad faith to ratify the 15th Amend-

In all these complaints the system evidently shows want of red blood, and Mr. Churchill, in his work of Diseases of Females, says: "Bearing in mind that the blood is remarkably deficient in red corpuscies, and the known property of from to correct this condition, there is the Citrate." Citrate of Iron enters largely into the composition of English Female Bitters, combined with powerful vegetable tonics of rare qualities.

Among the mountains of Tennesees and the piney woods of Mississippi, is found a certain hard and flinty root, which has been in secret use by some old missives for many years, possessing magic powers in revoluting and restoring all females suffering with any affection of the womb. This root we have obtained, predict a fair test in our practice, and it is new one of the principle ingredients in these Bitters. Other powerful uterine and general fonics also enter into its composition. We also add Leptandra or Black root, sufficient to act upon the liver and keep the bowels open.

Middle-aged matrons, those at the critical period, and the aged grandmother, are all cured by the use of our English Female Bitters, now preseribed and used by physicians all over the country.
